---

Dear Hiring Manager,

I am a backend developer with over 8 years of experience specializing in Python/Django, REST APIs and the integration of industrial protocols (SNMP, Modbus, BACnet) with data center infrastructure platforms (DCIM). At Bjumper I have designed and maintained integration solutions used daily by major enterprise clients, built scalable ETL microservices, and independently developed tooling — such as an SNMP monitoring system with automated discovery — that materially reduced delivery and incident-response times.

I am writing to express my interest in backend engineering opportunities in Switzerland. The Swiss industrial and technology landscape — from automation and pharma to fintech and research — is exactly where my profile delivers the most value: reliable backend systems that talk to real-world infrastructure. As an EU citizen (Spain), I am eligible for a Swiss work permit (B permit) immediately upon hiring under the CH-EU bilateral agreements, with no visa sponsorship required. I am available immediately, and I am open to relocation as well as remote or hybrid arrangements.

I work comfortably in English in international teams, Spanish and Catalan are my native languages, and I am actively learning German. I would welcome the opportunity to discuss how my experience in industrial integrations and backend architecture can contribute to your team.

Thank you for your time and consideration.

Oriol Macias

Madrid, Spain · open to relocation to Switzerland
