

# Oriol Macias

## Senior Backend Developer | Industrial IoT, Integrations & AI

Madrid, Spain · Spanish (EU Citizen) · Born 1994 · Swiss B-Permit eligible ·  
Notice period: 2 weeks · Open to relocation to Switzerland

**Email:** oriolomb@gmail.com **LinkedIn:** linkedin.com/in/oriolmaciasbadosa

**GitHub:** github.com/MaciWP **Web:** oriolmacias.dev

## PROFESSIONAL SUMMARY

Backend developer with over 8 years of programming experience, specialized in Python/Django and REST APIs. Experienced in integrating industrial protocols (SNMP, Modbus, BACnet) and delivering reliable solutions for data center infrastructure (DCIM). Practical experience with CI/CD and testing, currently expanding knowledge in performance optimization and AI-assisted automation.

## WORK EXPERIENCE

### Senior Backend Developer — Bjumper 2018 – Present

- Design, development and maintenance of integration solutions between industrial protocols (SNMP, Modbus, BACnet) or external applications (PowerIQ, HPE IMC, Invision, VMware) and DCIM platforms (iTRACS, ITA, DCE).
- Development of scalable, agnostic microservices for data extraction, transformation and loading (ETL) using REST APIs.
- Delivered 8+ operational projects using agile methodologies (Kanban, Scrum) with C#, Python, .NET (Framework & Core), Django and Django REST Framework.
- Database and DevOps operations with PostgreSQL, Docker, GitHub and AWS.
- ▶ **Independently developed an SNMP monitoring tool** with an autodiscovery method that significantly reduced device discovery time.
- ▶ **Created a DDF configuration-file generator** from MIBs and SNMP walks, drastically reducing development time.
- ▶ **Led the development of several core systems** used by major enterprise clients, reducing system response times by up to 45%.

**Stack:** Python · Django · C# · .NET · PostgreSQL · Docker · SNMP/Modbus/BACnet · AWS

### Junior Developer (Android/C#) — Busmatick 2018

- Developed Android and Windows desktop applications for public transport card management, backed by a SOAP API built for both clients.
- Implemented NFC operations for MIFARE Classic 1K cards, including a secure system for encrypted sensitive card operations and Bluetooth receipt printing.

**Stack:** C# · Android · SOAP · NFC

### Systems Administrator & IT Support — SERES · Educand SCCL · Salt City Council 2014 – 2017

- **SERES (2017):** technical support for an e-invoicing platform — resolved 200+ tickets (EDI/XML, Spanish e-invoicing compliance) with a high first-contact resolution rate.
- **Educand SCCL (2015–2017):** end-to-end IT administration for an 800+ user educational center — 500 workstations, 300 laptops, 10 physical servers and full network topology.
- **Salt City Council (2014–2016):** development intern — built WPF/C# applications for municipal database management, still in active use.

## TECHNICAL SKILLS

**Programming Languages:** Python, C#, .NET, Java

**Frameworks & Libraries:** Django, Django REST Framework, FastAPI, Flask, SQLAlchemy, Alembic, Celery, Pytest, WPF

**Protocols & Data Formats:** SNMP, Modbus, BACnet, REST API, JSON, XML, JWT, NFC

**DevOps & Tools:** Docker, Git, GitHub, GitHub Actions, CI/CD, AWS, Nginx, Unicorn  
**Databases:** PostgreSQL, MySQL, Redis

## SELECTED PROJECTS

---

**ThinkData Backend** (Bjumper) — advanced datacenter management platform with AI capabilities: real-time monitoring, analysis and optimization of infrastructure. Python · Django · PostgreSQL · Docker · REST API · AWS

**iTRACS MicroService** (Bjumper) — bidirectional integration platform synchronizing datacenter infrastructure data between heterogeneous systems and iTRACS DCIM. Python · Django · REST API · PostgreSQL · Docker

**HPE IMC Service** (Bjumper) — extraction, processing and synchronization of network infrastructure data from HPE Intelligent Management Center to external systems. Python · Django · PostgreSQL · Docker · REST API

**SNMP Monitor** (open source) — network device monitoring platform with automated discovery, real-time visualization and MIB management. Python · Django · Celery · Redis · PostgreSQL — [github.com/MaciWP/TrackData](https://github.com/MaciWP/TrackData)

**CV Portfolio** (open source) — this multilingual CV/portfolio site (EN/ES/FR/DE), 100/100 Lighthouse, PWA. Astro · Tailwind CSS · vanilla JS — [github.com/MaciWP/CV\\_Astro](https://github.com/MaciWP/CV_Astro)
