Oriol Macias

Senior Backend Developer | Industrial IoT, Integrations & AI

oriolomb@gmail.com · linkedin.com/in/oriolmaciasbadosa · github.com/MaciWP · oriolmacias.dev
Madrid, Spain · Spanish (EU Citizen) · B-Permit Eligible · Born 1994 · Available immediately · Open to relocation to Switzerland

Backend developer with 8+ years specialized in Python/Django and REST APIs, integrating industrial protocols (SNMP, Modbus, BACnet) into data-center infrastructure. Currently working with AI daily — using it as a tool and integrating LLMs into real products.

EXPERIENCE

Senior Backend Developer — Bjumper 2018 - Present

- Design, development, and maintenance of integration solutions between industrial protocols (SNMP, Modbus, BACnet, etc.) or external applications (PowerIQ, HPE IMC, Invision, VMware, etc.) and DCIM platforms (iTRACS, ITA, DCE, etc.)
- Development of scalable, agnostic microservices for data extraction, transformation, and loading (ETL) using REST APIs
- Participated in 8+ operational projects using agile methodologies (Kanban, Scrum)
- Used C#, Python, JavaScript, .NET (Framework & Core), Django, and Django REST Framework

KEY ACHIEVEMENTS

- Independently developed an SNMP monitoring tool with an autodiscovery method that reduced discovery time
- Created an application to generate DDF configuration files using MIBs and SNMP walks, reducing development time

Junior Developer (Android/C#) — Busmatick 2018

- Developed mobile applications for Android and desktop applications for Windows focused on public transport card management
- Built a SOAP API to manage the backend for both applications
- Implemented NFC technology for MIFARE Classic 1K card operations

KEY ACHIEVEMENTS

- Successfully implemented the complete RDR application for public transport cards
- Created a secure system for handling encrypted sensitive card operations

Systems Administrator & IT Support — SERES, Educand SCCL, Salt City Council 2014 - 2017

- SERES (2017): Technical support for electronic invoicing platform, resolving EDI/XML format issues and ensuring compliance with Spanish e-invoicing regulations
- Educand SCCL (2015-2017): End-to-end administration of IT infrastructure for an educational center (800+ users). Managed deployment and maintenance of 500 workstations, 300 laptops, 10 physical servers, and full network topology (cabling, switching, and 20+ Access Points).
- Salt City Council (2014-2016): Development intern creating internal WPF/C# applications for municipal database management and citizen services

SKILLS

Programming Languages: Python, C#, .NET, Java
Libraries & Frameworks: Django, FastAPI, Flask, SQLAlchemy, Alembic, Celery, WPF, Pytest
Protocols & Data Formats: SNMP, Modbus, BACnet, REST API, JSON, XML, JWT, NFC
DevOps & Tools: Docker, Git, GitHub, GitHub Actions, CI/CD, AWS, Nginx, Gunicorn
Databases: PostgreSQL, MySQL, Redis

AI: Claude Code (daily), LLM integration

SELECTED PROJECTS

Poneglyph — Personal orchestration layer for AI coding agents (Claude Code): skills, hooks, rules and multi-agent workflows that turn an LLM into a disciplined engineering co-worker. [TypeScript, Bun, Claude Code, LLM, AI Agents]

SNMP Monitor — Comprehensive platform for network device monitoring via SNMP protocol, featuring automated discovery, real-time visualization, and MIB management for infrastructure tracking. [Python, Django, PostgreSQL, Celery, Redis, SNMP]

Card Vision Tracker — Computer vision application for real-time card detection and score tracking using ONNX models. [Python, Kivy, ONNX, NumPy]

Bjumper (proprietary): ThinkData Backend, iTRACS MicroService, HPE IMC Service, VMware MicroService, NFC Assets Manager, PowerIQ-ITA Service — DCIM & integration platforms (Python/C#, Django, REST, PostgreSQL, Docker, AWS)

EDUCATION

Higher Technical Diploma in Multiplatform Application Development
UNIR - Universidad Internacional de La Rioja · 2025

Technical Diploma in Microcomputer Systems and Networks
IES Salvador Espriu · 2012

LANGUAGES

Spanish — Native
Catalan — Native
English — Professional Working Proficiency
German — Learning
